Why Choose SOS Alert?

- The SOS Alert **4G LTE** gives clients peace of mind and security
- It makes it easier to maintain independence by keeping them in contact with the *Emergency Response Center* at all times.
- The SOS Alert **4G LTE** can be worn in the shower ensuring protection where clients are most vulnerable to slips & falls.
- Expect industry-leading medical response times via multiple UL Certified US-based central stations

Dimensions

How it works

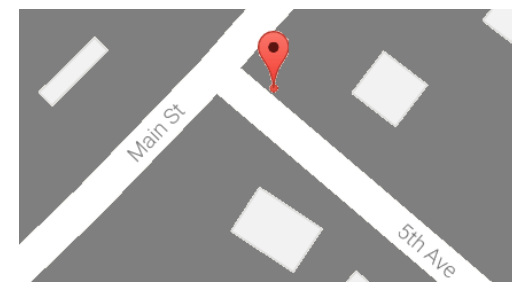

Client activates SOS Alert

Care Specialist establishes two-way voice communication & assesses the situation

Medical authorities are dispatched to the client's location determined via the SOS Alert's on-board GPS

Friends & family are advised that medical assistance has been dispatched to the client's location
